

COLLAGEN SYNERGY

DIETARY SUPPLEMENT

Advanced formula with 10,000 mg Collagen, 200 mg Hyaluronic Acid and 200 mg Elastin for skin regeneration from within, enhancing elasticity and deep hydration for a smooth and radiant skin. Supports vascular elasticity and joint flexibility.

10,000 mg

Hydrolyzed Bovine Collagen

Superior absorption, restore skin structure, firmness, reduce wrinkles

1,000 mg

Vitamin C

Collagen synthesis

200 mg

Hydrolyzed Bovine Elastin

Restore skin elasticity, lift sagging area

200 mg

Hyaluronic Acid

Intensive hydration, plumping the skin

50 mg

Resveratrol

Anti-aging, anti-inflammatory, skin-protective

30 mg

Coenzyme Q10

Cell renewal, reduce dullness

5 mg

Biotin

Keratin production for healthier hair, skin and nails

*For individuals aged 25 and above who wish to improve skin, hair, nails, joints, and prevent aging. Suitable for both men and women.
Dosage: Take 1 sachet daily. Dissolve the powder in 200–300 ml of water.*

SCIENTIFIC BASIS

Hydrolyzed collagen supplementation significantly improved skin moisture and elasticity, while reducing wrinkles after 90 days of use, according to a large meta-analysis of 19 clinical trials involving 1,125 participants (95% female, aged 20–70).

Hyaluronic acid at a daily dose of minimum 120 mg increased skin hydration, reduced transepidermal water loss, improved elasticity, and reduced wrinkles within 8–12 weeks, based on a randomized clinical trial involving 40 healthy adults aged 35–64.

Elastin peptides in a dose of at least 100 mg/day helped reduce crow's feet wrinkles, increased skin moisture, enhance skin's natural glow, and showed no adverse effects after 12 weeks, according to a clinical study conducted with 100 adult participants in South-Korea.

RIAVITA RECOMMENDATION

Collagen Synergy is a support to

- Rejuvenate and firm the skin,
- Enhance skin hydration and plumpness,
- Reduce the appearance of wrinkles,
- Promote healthy, shiny hair and nails,
- Support joint health and flexibility,
- Protect and restore blood vessels,
- Contribute to normal bone functions,
- Teeth and gums support,
- Immune support after intense physical exercise.
