EMF Protection

Restores Energy Balance

ULM Energy Blanket

The ULM Blanket is a non-invasive and effective way of protecting the body from external EMF and RF radiation emitted by different appliances and technologies. At the same time the ULM Blanket reflects user's own electromagnetic radiation in the infrared and extremely high frequency ranges, thus normalising energy exchange and improving recovery capability of the body.

INFLUENCING FACTORS:

- Protection of the covered body from external electromagnetic and electrostatic radiation;
- Reduced heat emission and normal heat exchange due to reflected heat radiation in the infrared spectrum of electromagnetic waves;
- Influencing the user with his/her intrinsic electromagnetic radiation of extremely high frequency (the working frequency of body cells);
- Redistribution of surface electric charge on the patient.

The ULM blanket is made of multi-layered metallic coated films, covered by wool-cotton material. The reflected infrared radiation gives a very relaxing and soothing warm feeling. The weight and size makes the blanket an easy to use and 'take anywhere' product.

The ULM Blanket can be ordered in three different sizes:
small - 110x160mm
standard - 220x160mm
large - 220x205mm

ULM Clothes

The Clothes are modifications of the ULM Energy Blanket and can be used when walking, sitting, lying or sleeping. The clothes are for individual use only. The ULM Clothes are available in S, M, L, XL and XXL sizes.

ULM Bootlegs hip, crus, knee and ankle-joint areas	ULM Boots foot and ankle-joint areas	ULM Knee-caps knee-joint area	ULM Mat Mat 42 x 44cm	ULM Bandage Blanket bandage blanket (2m) different body parts	ULM Shorts hip joints, abdominal small pelvis, urinary and privates organs
					
ULM Clothes - EMF Protection of individual body parts					
					
ULM Cap head, face and neck areas	ULM Pereline neck, shoulder girde and chest	ULM Mittens hands and wrist joints	ULM Waiscoat chest, stomach, spine and thoracic areas	ULM Oversleeves forearms, elbow and wrist joints areas	ULM Belt lumbrosacral and stomach areas
